

THE RANGE OF BETS ON BLACKJACK CHALLENGE

Blackjack Challenge tables have varying minimum and maximum bets. Before you sit down, please check the sign displaying the minimum and maximum bets at the table, or ask any of our gaming team for assistance.

ADDITIONAL BONUS WAGERS

Players may have additional bonus wagers on a Blackjack Challenge table that provides boxes for the additional bonus wager. Please refer to the limits and payout odds displayed at the table or ask our staff for more information.

THE ODDS OF WINNING

Blackjack Challenge is a card game of chance and skill in which players may improve their chance of winning by using a betting strategy. The House margin for Blackjack Challenge is approximately 2.0% depending on the skill level of the player.

RESPONSIBLE GAMING

HOW TO PLAY BLACKJACK CHALLENGE

Blackjack Challenge is a variation of Blackjack where the aim of the game is to draw cards totalling closer to 21 than those in the Dealer's hand - without exceeding 21. All cards in Blackjack Challenge are dealt the same as Blackjack. **Please do not touch the cards.**

PLAYING THE CARDS

If you do not have Blackjack on your first two cards, you may decide to stand (draw no more cards) or hit (draw more cards) until you decide to stand, or until your point total goes over 21 in which case you lose. You must hit if the point total of your cards is 11 or less.

Picture cards (Jack, Queen and King) count as 10, Aces count as 1 or 11, whichever is to your advantage e.g. Ace, 8, 10 = 19. However, an ace in the first 2 cards of a double down has a value of 1, not 11. Any other cards (2, 3, 4, 5, 6, 7, 8, 9, 10) count as face value.

BLACKJACK

If the first two cards of your original hand or split hand are an Ace and any ten-point card, you have Blackjack. The odds you will be paid will depend on if the dealer also has a Blackjack and the rank of your 10 value card when compared with the dealer 10 value card.

PLAYER HAS BLACKJACK

The rank of cards for the purpose of determining blackjack payouts from highest to lowest is king, queen, jack and 10. A player blackjack will be paid at the odds listed below:

DEALER'S HAND	DEALER'S 10 VALUE CARD	ODDS
Blackjack	Ranked lower than Player's 10 value card	5 to 1
Blackjack	Same ranked as Player's 10 value card	4 to 1
Blackjack	Ranked higher than Player's 10 value card	3 to 1
Dealer does not have Blackjack		2 to 1

PLAYER HAS 21 (PLAYER 21)

In the event your point total equals 21 (not Blackjack), you automatically win and the dealer will pay you even money.

FIVE CARD TRICK

In the event you draw 5 cards to a hand without exceeding 21, you automatically win and the dealer will pay you even money.

DOUBLE

You may elect to double on the first two cards or first three cards dealt to your original or split hands by placing a wager of not more than your original wager. You will then be dealt one additional card face upwards and placed sideways to that hand.

In the event your point total equals 21 (Player 21) after doubling, you automatically win and the dealer will pay you even money.

If the dealer obtains Blackjack after you have doubled and not achieved Player 21, the dealer will only collect an amount equal to your original bet from the remaining bets.

SPLITTING

If your first two cards have the same point value, you may ask the dealer to split your hand, to form two separate hands, by betting an amount equal to the original bet. Each hand will be played and completed in turn. At least one card will be dealt to each hand. You are only allowed to split twice per box forming three hands per playing area.

You may also double in a split hand providing the hand contains two or three cards. Blackjack, Player 21 and Five Card Trick can be achieved on split hands.

If the dealer obtains Blackjack after you have split and you have not achieved Blackjack, Player 21 or Five Card Trick, the dealer will only collect an amount equal to your original bet from the remaining bets.

DEALER'S HAND

Irrespective of your point totals, the dealer must hit with 16 or less and stand with 17 or more. If the dealer goes over 21, all hands remaining on the table must be paid even money. If you finish with a total closer to 21 than the dealer's total, you win and will be paid even money. If you have a point total equal to or less than the point total of the dealer's hand and the dealer's hand does not exceed 21, you lose.
