## HOW TO PLAY GAMING MACHINES

The aim of playing on gaming machines is to activate the machine and come up with a winning combination.

There are different types of gaming machines, some you need to select numbers and some you select lines to play. Please refer to the game rules on the gaming machine or ask our staff about the different features.

To play the gaming machines simply insert your cash or coins, select the options you wish to play then press the START/SPIN button to activate the machine. Some machines will automatically activate when you select the number of credits you wish to play.

The gaming machine calculates and displays your payout automatically based on the result of the spin. You may then have the option of gambling your win or paying the proceeds directly to your credit meter.

There are many different denominations of gaming machines and care should be taken to ensure you are playing a machine with your desired denomination.

When cashing out simply press the COLLECT button and your payout will be dispersed in coins or a payout voucher for larger payouts.

## PROGRESSIVE JACKPOT MACHINES

On progressive jackpot machines a percentage of each bet is contributed to the jackpot and can be won randomly or by a set combination appearing on the machine. Some jackpots are part of a group of machines..

## THE ODDS OF WINNING

Gaming machines in casinos in Queensland are approved by the Queensland Office of Liquor and Gaming Regulation to be programmed to return an expected average rate of a minimum 85% or greater, to the player over a long period of time. This player return rate is not an outcome on a single game, but an average of many games on a machine over a period of time.

The reason for this is that gaming machines use the concept of chance and randomness.

Chance is the likely outcome of a particular event and randomness is the order in which the outcome will occur. For instance, the chance of getting a 'head' or 'tail' when you toss a coin is 50/50 and there is no particular order in which the head or tail will occur this is called randomness.

As gaming machines have far more possibilities than a coin (to which only has two possibilities - head or tail) the chance and randomness of achieving a winning outcome is very different.

Generally, the higher the prize the more unlikely it is to occur.

PRIZE VALUE	CHANCE OF PLAY HAPPENING ON A SINGLE PLAY LINE (INCLUDING SCATTERS)
1 CHANCE IN:	
More than 500	10,198
200 to 499	2,669
100 to 199	1,458
50 to 99	450
20 to 49	246
10 to 19	106
5 to 9	53
1 to 4	10

PRIZE TYPE BY SYMBOL COMBINATION	CHANCE OF PLAY HAPPENING ON A SINGLE PLAY LINE (INCLUDING SCATTERS)
HIGHEST PRIZE COMBINATION	1 CHANCE IN:
5 of kind	9,765,625
4 of kind	4,784
3 of kind	490
2 of kind	45
1 of kind	9
Overall chances on a single play line	
Chance of ANY prize	1 in 8
Chance of NO prize	7 in 8

### Caution:

- All the values shown are averages. It is likely that significant variations to these will happen during any session of play.
- If the machine you are playing is a linked machine, the chances of a prize or combination occurring will be different to those above.
